

Every business has contractual compliance to manage

[View online version](#)

Compliance to smaller suppliers is important but not urgent. With a tsunami of regulatory and contractual commitments including Privacy, ISO27001, credit cards, health & safety and more, your business faces a constant uphill struggle to stay ahead for a reasonable cost. Business Comply is a new approach to staying ahead of the rules and regulations before they bite.

Larger enterprises need good governance tools?

We work with Gartner's leading business process and documentation platform - BusinessOptix. Let us take the grind out of keeping track of the paper work and joining it up for you or your customers.

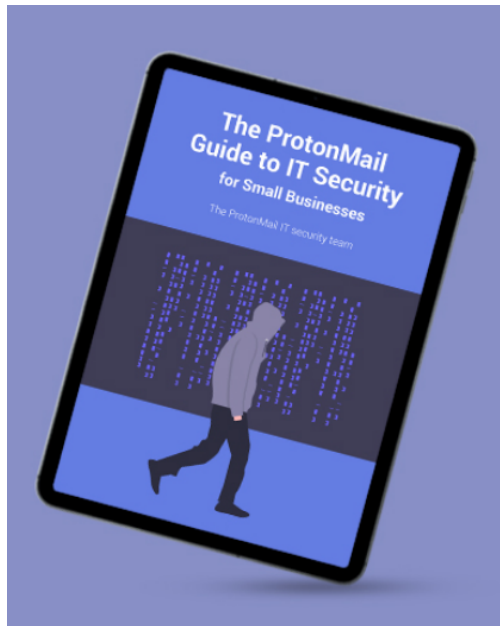

For corporate needs

ISO27001 and GDPR a membership services for the smaller business.

From Barista to Barrister there is no avoiding data privacy if you want to sleep at night. Our membership scheme will bring free ISO27001 and entry GDPR record keeping, aimed specifically for the micro and smaller business internationally.

Proton Mail and VPN.

Swiss based Proton brings a military secure alternative to the personal free mail accounts that are trawled to target advertising.

Better still, Proton is good for bigger businesses from mobile and desktop, so all the eggs are not in the same basket. They write good non-salesy books too!

Who or what is Business Comply Limited?

Smart business people who aren't paperwork hobbyists need a quality point of assistance that they can afford for all aspects of compliance. They need quality as being smaller still needs quality and consistency in compliance. They need trusted allies to help them stay on track, yet there is no such capability unless they work with a myriad of specialists on a topic-by-topic basis. There is clearly strength in numbers when members share their experiences.

Business Comply Limited is a UK located private company where members can be shareholders. The team are all experienced individuals who want meaningful change, better ways of working that transform how smaller and larger businesses go about managing an ever increasing regulatory work load.
